Date 26 November 2019  
Subject List of quieter routes in The Netherlands, COMMISSION  
REGULATION (EU) No 1304/2014

Dear Mr Doppelbauer, *Dear Josef,*

As foreseen in article 5c, paragraph 1 of Commission Regulation (EU) No 1304/2014, I send the European Union Agency for Railways in accordance with the procedure set out in Appendix D.1. of the Commission Regulation the list (Annex 2 of this letter) of designated quieter routes in the Netherlands. In addition to this, Annex 1 contains a map which clarifies the designated lines. The lines which are included in Annex 2 of this letter are compliant with the criteria of article 5b of the aforementioned Commission regulation.

The number of average freight trains during night-time (11 p.m. - 7 a.m.) is based on the measured numbers of freight traffic from ProRail's traffic control system for the years 2015, 2016 and 2017. Movements with separate locomotives – as they are into the scope of our national legislation transposing Directive 2002/49/EC – are included if these were carried out for the benefit of freight traffic. First, an average was calculated over the number of days in the year in question; then an average over three years.

I hope to have informed you sufficiently.

Yours sincerely,

DIRECTOR FOR PUBLIC TRANSPORT AND RAILWAYS
